

The main objectives of TEQIP-II project are Strengthening Institutions to improve Learning Outcomes and Employability of Students. Many organizations visiting campuses for recruitment point out that the employability of students are not as expected due to poor communication and professional skills.

The broad objectives of high intensity training on “Industrial Automation” are

- a) To gain strong underpinning knowledge and expertise in Industrial Automation covering a wide range of skills ranging from instrumentation, automation and process control, industrial data communications, process plant with a strong practical focus.
- b) To have guidance from industrial automation experts in the field with extensive experience.
- c) Since industrial automation is an extremely fast moving & the field is diverse and dynamic it offers students the opportunity for a well paid and enjoyable career.
- d) To empower the students with practical knowledge that will improve their productivity in the area and make them stand out as a leader in industrial automation.
- e) To assist the Placement Cell of the College for a placement drive.
